Personal Statement

I am a highly motivated and hard working individual, with a methodical approach to working and an eagerness to learn and develop personal skills in a practical setting. After working in the shopfitting industry and studying at university, I am accustomed to working in a challenging, fast paced environment, particularly when dealing with multiple projects and priorities at the same time. Having had a challenging couple of years due to the impact of COVID-19 on both my career and university studies, I am ready to get back on course to doing the things I love and excel at.

Work Experience

February 2022

JD Wetherspoon

Whilst taking a leave of absence due to the impact of COVID-19 on the structure of my course, I worked as kitchen staff, where I had to work in a very fast paced, challenging environment.

January 2021

Cardinal Project Management Limited

I got the chance to do some freelance work for my previous boss during my first year of university. I was given the task to create 3D visuals for a COVID-19 secure visitor pod, which would be used for carehomes with elderly and vulnerable people.

September 2019 - July 2020

Cardinal Shopfitting + Systems Ltd

I spent my time at Cardinal working in the design team. I helped create designs from concept stages, all the way through to final visual stages, before handing over to the technical design team to create the drawings for manufacture. Whilst there, I had to liaise with clients to discuss what they wanted and be able to interpret that into a working idea and communicating with the client throughout the project.

April 2020

Work Experience - Yorkshire Creative Group and Primark

I did some work for Yorkshire Creative Group on one of their projects for their client Primark. For this, I modelled a pop-up café with various schemes, layouts and rendered 3D images along with a couple of videos showcasing the design.

April 2019

Work Experience - Univar Solutions

I was tasked to create their office in a 3D model, to render it with a new wall colour scheme, and various different changes made to the existing office that will be used as part of the proposal to refit the office. In this project, I discussed with the client their preferences to finalise a design which suited their needs.

February 2019

Work Experience - Define Interiors

I worked with the team to create renders for three different schemes for a reception area.

July 2018

Work Experience - Arkle Boyce Architects

I spent a week working alongside the team renovating an old derelict building into modern offices and apartments. I designed and did the drawings and photoshop renders for one of the apartments.

October 2018

Work Experience - Yorkshire Creative Group

I had the opportunity to create concept designs for an interactive table for Yorkshire Creative Group, a retail design, 3D and VR company.

Education

2020 - 2022 Nottingham Trent University

2017 - 2019 UTC Leeds (A Levels)
 • Level 3 Technical Level Engineering:
 Engineering Design - Achieved
 Distinction * Distinction * Overall
 • AS Maths - D

2012 - 2017 Guiseley School (GCSE)
 Maths - A | Physics - B | Biology - B |
 Chemistry - C | Computing - C |
 Engineering - C | English Language - C
 | French - C

Skills

- Working as an individual or in a team
- Strong work ethic
- Creative problem solver
- Working quickly, but efficiently under pressure
- Motivated and ambitious

Activities

I have a passion for sailing dinghy's and belong to the Yorkshire Dales Sailing Club at Grimwith Reservoir. I helm and crew on various size dinghy's and yachts which requires teamwork, listening, leadership and reacting quickly to situations. I also enjoy climbing in my free time.
